WHAT IS THAT?

A web portal, integrated with a cartographic system, available to road hauliers for planning their stops under secure conditions, about the following:

their personal safety

respect for the rest periods in compliance with EU regulation

safeguarding of cargo

1

2

3

GEOSOSTA

The European Commission has intervened on professional transport by establishing common rules on the access to the profession and the market, working time, driving time and rest periods, use of the digital tachograph. The EC has also undertaken several initiatives to promote the increase and qualitative development of parking areas for drivers. The Commission's study on safe parking places for lorries revealed a general lack of adequate facilities at the European level.

Some regions and port areas of our territory show the same problems.

ANIA intends to keep promoting GEOSOSTA, convinced of its social usefulness.

The synergy between the different transport operators is essential to trigger a virtuous circle:

- 👍 more facilities available for road transport
- 👍 more use of protected structures
- 👍 more safe transport
- 👎 fewer criminal phenomena.

WITH GEOSOSTA YOU CAN

- 1 Identify, already in the route planning phase, the location, the type, the services offered by the guarded parking areas, service areas and logistic centres in Italy, located along the road and motorway network and near the main ports
- 2 Download the coordinates (Point Of Interest) of the structures registered in the Portal on your mobile
- 3 Have a personalised list of guarded parking areas, service areas by region of interest
- 4 Access to the websites of the facilities (where available) to acquire further information (e.g., tariffs, conventions).

GEOSOSTA

WHAT ARE THE BENEFITS?

GEOSOSTA is a free initiative, is beneficial for all and requires only a few minutes of your time.

Road hauliers and Freight forwarders

You can

have an up-to-date practical guide to facilities offering protection and quality services

contribute effectively to the identification of a widespread network of reliable structures

encourage park and service area managers to adapt to the many changing needs of road transport

Site managers (guarded parking area, service area, logistic centres)

You can

Have more significant visibility

Benefit from the economic returns related to the increase of use of your facilities

GEOSOSTA

HOW IS COOPERATION POSSIBLE?

Road hauliers and Freight forwarders

Please report to geososta@ania.it new guarded parking areas, service areas and logistic centres not included in the Portal or variations/integrations to the information already contained therein.

Site managers

Please fill in the simple [check list](#) downloadable here and return the **GDPR** signed: your site will become part of the Portal.
